

PGP Fall/Winter 2011 Saliva Kit: Large Tube Collection Survey

Thanks for taking part in our PGP saliva sample collection! As we collect samples we would like to learn more about what factors are needed for ideal sample collection. This survey has questions about your collection that will help us figure out the best method to maximize DNA yield and minimize bacterial content. We have some rough ideas, but we really aren't sure -- that's part of why we gave you multiple tubes.

The answers you provide should be considered public and may be later associated with your other PGP data. You may skip answering any questions (other than the fields necessary for sample identification), or skip the survey entirely.

* Required

Do not touch! *

This field is pre-populated by the PGP and identifies which participant you are. If you change it, we will not be able to link your answers to your PGP account.

Your answer

Which sample tube did you just collect? *
